

GENERAL CARGO

Tirrena is a forwarding company operating worldwide, with a core-business focused on logistics services and international shipments: sea, air and land transport.

The company offers its own range of solutions dedicated to the wide sector of general cargo: from containerized goods to bulk cargo, from refrigerated containers to the transport of dangerous goods, from the shipment of a few pallets to the most demanding challenges for the transport of project cargo or heavy and bulky packages.

Tirrena puts at customers' disposal its own facilities, with a large storage and handling capacity, ensuring punctual and safe deliveries both for full loads and for groupage loads, also with the possibility of consolidation of the goods, if requested by the customer.

A specialized team is able to identify the most suitable mode for each shipment and type of goods, offering customized solutions ranging from single service to the integrated management of all phases of transport, representing, if necessary, the only reference point for the realization of a complete "door to door". The ability to satisfy the most diverse requests from the world of general cargo, with targeted solutions and high quality standards, while maintaining very competitive commercial conditions, makes Tirrena a strategic logistics partner able to make the difference in your business.
